Fourth Quarter 2022 Guidance

The following statements are forward looking statements based on current expectations and involved risks and uncertainties. The Company expects (in accordance with IFRS):

- Revenue to decrease by 13% to 15% QoQ.
- Gross margin to range from 30% to 32%.

SMIC management commented:

in shipment and a small increase in blended ASP due to product mix optimization, therefore the revenue remained flat comparing to the previous quarter. Externally, demand declined and internally, some fab conducted annual maintenance, while the monthly capacity increased by 32 thousand 8-inch equivalent wafers, thus the capacity utilization was 92.1%, down five percentage points from the previous quarter. Combining the above factors, gross margin for the third quarter was 38.9%, down 0.5 percentage points sequentially.

In the fourth quarter, due to the weak demand in the mobile phone and consumer market, and overlapping with the impact from that some customers need time to interpret the newly released US % sequentially, with gross margin in the range of 30% to 32%. According to the results of the previous three quarters and the mid-point of guidance for the fourth quarter, the Company's full year revenue is expected to be around \$7.3 billion, up around 34% year-over-year, and gross margin is expected to be around 38%. The capital expenditure plan this year is revised upwards from \$5.0 billion to \$6.6 billion.

About the recently updated and revised export control rules by the United States, according to a preliminary interpretation, the new rules have an adverse impact on our production and operation. We have maintained close communications with suppliers, while the clarification of some definitions in the new rules and the assessment of impact on the Company are still in progress.

Based on the current macroeconomic trends and the pace of de-stocking, we have yet to see signs of recovery in the industry. The adjustment may last longer as this cycle is overlaid with multiple complex external factors. The development of the Company is inseparable from seizing the momentum when the industry is booming, and even more inseparable from persistence and patience when the industry is going through a difficult time. We are still full of confidence in the Company's medium-to long-term development.

About Non-International Financial Reporting Standards Measures

The presentation of non-IFRS financial measures, including EBITDA, EBITDA margin and non-IFRS operating expenses in this release. The presentation of non-IFRS financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with IFRS. These non-IFRS financial measures are not calculated or presented in accordance with, and are not alternatives or substitutes for financial measures prepared in accordance with IFRS, and should be read only in conjunction with the Group's financial measures prepared in accordance with IFRS. The Group's non-IFRS financial measures may be different from similarly-titled non-IFRS financial measures used by other companies.

SMIC believes that use of these non-

IFRS financial measures to understand, manage and evaluate the Group's business and make financial and operational decisions.

The accompanying table has more information and reconciliations of each non-IFRS financial measure to its most directly comparable IFRS financial measure.

Notes:

(1) Non-IFRS operating expenses are defined as operating expenses adjusted to exclude the effect of items listed in the following table. SMIC reviews non-IFRS operating expenses together with operating expenses to understand, manage and evaluate its business and make financial and operational decisions. The Group also believes it is useful supplemental information for investors and analysts to assess its operating performance. However, the use of non-IFRS financial measures has material limitations as an analytical tool. One of the limitations of using non-IFRS financial measures is that they do not include all items that impact our net profit for the period. In addition, because non-IFRS financial measures are not calculated in the same manner by all companies, they may not be comparable to other similarly titled measures used by other companies. In light of the foregoing limitations, you should not consider the non-IFRS operating expenses in isolation from or as an alternative to operating expenses prepared in accordance with IFRS.

The following table sets forth the reconciliation of the non-IFRS operating expenses to its most directly comparable financial measure presented in accordance with IFRS, for the periods indicated.

(2) EBITDA is defined as profit for the period excluding the impact of the finance cost, depreciation and amortisation, and income tax credit and expense. EBITDA margin is defined as EBITDA divided by revenue. SMIC uses EBITDA margin as a measure of operating performance; for planning purposes, including the preparation of the
